Total annualized capital/startup costs	NA	NA
Total annual costs (O&M)	NA	NA
Total annualized cost requested	NA	NA
Difference		NA
Explanation of difference		
Program change		NA
Adjustment		NA
Other change** The High School Longitudinal Study of 2009 (HSLS:09) is a nationally representative, longitudinal study of more than 20,000 9th graders in 944 schools who will be followed through their secondary and postsecondary years. The study focuses on understanding students' trajectories from the beginning of high school into university or the workforce and beyond. What students decide to pursue when, why, and how are crucial questions for HSLS:09, especially, but not solely, in regards to science, technology, engineering, and math (STEM) courses, majors, and careers. This study includes a new student assessment in algebraic skills, reasoning, and problem solving and like past studies, will survey students, their parents, math and science teachers, school administrators, and school counselors. HSLS:09 will produce not only a nationally representative dataset but also ten individual state representative datasets for each of ten states. The attached change memo includes updated letters and screenshots of the HSLS:09 efforts to update student enrollment status from schools and to maintain student contact information from parents.
